

SELLING TO USSOCOM

Fall 1999

UNITED STATES SPECIAL OPERATIONS COMMAND
OFFICE OF THE COMMANDER IN CHIEF
3001 PAVIA POINT BOULEVARD
MCLELLAN AIR FORCE BASE, FLORIDA 32111

The United States Special Operations Command (USSOCOM) is dedicated to providing the best equipped and trained special operations forces in the world: "Quiet professionals" who can be relied upon anytime, anyplace.

One of the command's five goals is to "develop, acquire, and field state-of-the art equipment." Acquiring the right products is paramount to the safety of our forces as well as a battle force multiplier. With your partnership, we can provide our forces with the most sophisticated, technologically superior equipment available. The men and women of USSOCOM are truly America's finest, and deserve no less.

This pamphlet provides a good first look at USSOCOM's mission, organization, and acquisition requirements. I encourage you to read it carefully and contact the Technical Industrial Liaison Officer, Small and Disadvantaged Business Utilization Officer, or Competition Advocate General to further explore the business opportunities that exist at USSOCOM.

A stylized, handwritten signature in black ink, reading "Peter J. Schoomaker".

Peter J. Schoomaker
General, U.S. Army
Commander in Chief

WHAT IS USSOCOM?

The mission of the United States Special Operations Command (USSOCOM) is to prepare special operations forces (SOF) to conduct successful world wide special operations, civil affairs, and psychological operations, in peace and war, in support of the geographic commanders-in-chief, American Ambassadors and their country teams, and other government agencies.

The congressional legislation creating USSOCOM delineated specific tasks for the command - among them: *1)* prepare assigned forces to carry out special operations, monitor the readiness of assigned and forward deployed forces, *2)* monitor the professional development of all SOF personnel, *3)* develop SOF doctrine, tactics, techniques, and procedures, *4)* conduct specialized courses of instruction, *5)* train assigned forces and ensure interoperability, *6)* manage programs and budget Major Force Program (MFP)-11 funds, *7)* and conduct research, development, and acquisition of SOF-peculiar items. These last two tasks make USSOCOM unique among the unified commands, and have been key to USSOCOM's success in building the world's premier special operations force.

The USSOCOM components are the United States Army Special Operations Command (USASOC), the Air Force Special Operations Command (AFSOC), the Naval Special Warfare Command (NAVSPECWARCOM), and the Joint Special Operations Command (JSOC). In addition to the assigned operational headquarters and forces, the Army, Navy, and Air Force special operations schools and centers have been assigned to the command. They are: the John F. Kennedy Special Warfare Center and School (Army); the Naval Special Warfare Center; the United States Air Force Special Operations School; and the Joint Special Operations Forces Institute (JSOFI).

Today, special operations forces are deployed worldwide providing forward presence and working with host nation military forces. They are better equipped, trained, and organized than at any time in our history.

The office of the Acquisition Executive (AE) is responsible for all special operations forces research, development, acquisition and procurement. The AE directs the Special Operations Acquisition and Logistics Center (SOAL), which consists of four Program Executive Officers (PEOs), Fixed Wing (FW); Maritime and Rotary Wing (M&R); Intelligence and Information Systems (IIS); the Office of Advanced Technology (SOAL-T); the Directorate of Logistics; and the Directorate of Procurement. The Competition Advocate General (CAG) and Small and Disadvantaged Business Utilization (SADBU) are located in the Procurement Directorate. The Technical Industrial Liaison Officer (TILO) is located in the Management Directorate reporting to the AE.

The field components may receive contracting support from one or all of the following sources; a field contracting office, a Service contracting office, or USSOCOM. The contracting offices receiving their contracting authority from USSOCOM have functional representation in the areas of the Competition Advocate and SADB. If you have any questions, the TILO, SADB, or CAG at USSOCOM can assist you.

WHAT DOES USSOCOM BUY?

The following categories of supplies and equipment are meant to be representative of the types of items USSOCOM and its field components procure in support of SOF. *This list does not represent any prioritization whatsoever, and is provided only as a guide to possible USSOCOM requirements.*

WHAT PROGRAMS DOES USSOCOM HAVE?

Small and Disadvantaged Business Utilization (SADBU)

The SADBU office is the advocate for small business utilization within USSOCOM and an important source of information tailored to assist small businesses. Contacting the SADBU office should be the first marketing step for a small business. The office at USSOCOM is manned with a full-time small business staff. Each field component contracting office has a part-time SADBU specialist. USSOCOM has many programs and initiatives to increase small and disadvantaged business participation in filling material/service requirements. You can contact the SADBU office at (813) 828-7549, Email perak@socom.mil, or by writing to:

US Postal Service or Express Mail:

USSOCOM
ATTN: SOAL-KS
7701 Tampa Point Blvd.
MacDill AFB, FL 33621-5323

Component SADBU's are listed on pages 14-16.

Competition Advocate General

The Competition Advocate General plans, directs and manages the USSOCOM competition program. This office can assist your firm by challenging barriers to full and open competition. In addition, the Competition Advocate General serves as the command's Ombudsman on all multiple award task/delivery order contracts. You can contact this office by phone (813) 828-7338, FAX 828-5481, E-mail davies@socom.mil, or by writing to:

US Postal Service or Express Mail:

USSOCOM

ATTN: SOAL-KM (Ms. Sharon Davie)

7701 Tampa Point Blvd.

MacDill AFB, FL 33621-5323

Technical Industrial Liaison Officer (TILO)

The TILO, a function of the Competition Advocate General office, is industry's initial point of contact within USSOCOM. This office has full-time responsibility as industry's interface with the command and can be your source for many informational products. The TILO chairs an Advance Planning Briefing to Industry (APBI) every other year, and is designated as the unsolicited proposal (USP) coordinator for USSOCOM. You may contact the TILO by; E-mail bowlesr@socom.mil, phone (813) 828-9482, FAX (813) 828-9488, or by writing to:

US Postal Service or Express Mail:

USSOCOM

ATTN: SOAL-MT (Mr. Scott Bowles)

7701 Tampa Point Blvd.

MacDill AFB, FL 33621-5323

Advance Planning Briefing to Industry (APBI)

USSOCOM conducts a formal briefing to industry in the spring of even numbered years. The APBI is intended to encourage and promote early and effective dialogue with industry during all phases of the acquisition planning cycle and provides information on a wide range of projected contracting opportunities. It provides a broad overview of long-term efforts, one to three years prior to solicitation, as well as specific information on near-term efforts and requirements. The TILO is responsible for planning these briefings and can assist you with information on the next planned APBI. Scheduled APBIs are announced in the Commerce Business Daily (CBD) and the USSOCOM SOAL Web page <http://soal.socom.mil>.

Broad Agency Announcement (BAA)

The BAA is a mechanism used by the Federal Government to competitively solicit research and development (R&D) proposals from the private sector. It is used when there is reasonable expectation that meaningful proposals with varying technical scientific approaches will be received. The BAA identifies in general terms, an activity's area of basic and applied research interest and that part of development not related to the development of a specific system or hardware procurement. Announcements of BAA release dates are published in the CBD. Each BAA typically includes:

- The activity's research interest, either for an individual program requirement or for broadly defined areas of interest, covering the full range of the activity's requirement.
- The criteria for selecting the proposals, their relative importance, and the method of evaluation.
- The period of time BAA responses will be accepted.
- Instructions for preparation and submission of proposals.

The activity evaluates proposals according to the published evaluation criteria using a peer or scientific review process. **NOTE:** *The activity need not evaluate proposals against each other because they are not submitted against a common work statement.*

To obtain copies of BAAs issued by USSOCOM, or on behalf of USSOCOM by another laboratory, contact the point of contact in the CBD notice, download it from the USSOCOM Web page soal.socom.mil, or contact the TILO.

PRO-NeT™/Central Contractor Registration

USSOCOM uses Pronet as its primary automated source for potential suppliers. All prospective contractors need to register with the Small Business Administration's online database, ProNet <http://www.sba.gov>. The Central Contractor Registration database is also used as a source for potential suppliers. Contractors are encouraged to keep their records current and up date them every 6 months. Registration may be accomplished through the internet at <http://www.acq.osd.mil/ec> or by calling 1-888-CCR-2423.

Firms wishing to submit product information should mail it to the TILO or SADBUs offices. ***SF 129's are no longer accepted.***

Small Business Innovation Research (SBIR) Program

USSOCOM is an active participant in the Federal SBIR Program mandated by the Small Business Innovation Development Act of 1982, Public Law 97-219. The objectives of the program include: stimulating technological innovation in the private sector; strengthening the role of small business in meeting Department of Defense (DOD) R&D needs; fostering and encouraging participation by small and disadvantaged businesses in technological innovation; and increasing commercial application of DOD-sponsored research or R&D results. For the purpose of the SBIR program, a small business is defined as any firm having fewer than 500 employees.

DOD publishes two SBIR solicitations annually. Winning proposals are awarded Phase I SBIR contracts for one-half to one man-year of effort, over a period generally not to exceed six months (subject to negotiation). The purpose of these Phase I efforts is to determine the scientific merit and feasibility of ideas submitted under the SBIR program. Subsequent Phase II awards are made to those firms which demonstrate successful Phase I results and submit a Phase II proposal with scientific and technical merit. Such awards typically cover two to five man-years of effort, over a period not to exceed two years (subject to negotiations). Phase II represents the principal research or R&D effort and is expected to produce a well defined deliverable product or process. The legislative history of Public Law 97-219 envisioned that Phase I awards would be in the neighborhood of \$100K, and Phase II awards \$750K.

DOD invites qualified firms with strong R&D capabilities in science and engineering, in the topic areas described in the SBIR solicitation, to participate. As required for all Federal Solicitations, DOD announces the availability of SBIR solicitations in the CBD. The SBIR Web site is: <http://www.acq.osd.mil/sadbu/sbir>.

Interested parties may order copies of the solicitation directly from the DOD SBIR Support Services, 2850 Metro Drive, Suite 600, Minneapolis, MN 55425-1566 or by calling (800) 382-4634. Questions about USSOCOM's SBIR efforts should be directed USSOCOM's SBIR Program Manager, Ms. Karen Pera, at (813) 840-5514 or E-mail perak@socom.mil.

WHAT INFORMATION IS AVAILABLE?

USSOCOM SOAL Web Page

The SOAL Web page contains information pertaining to USSOCOM's acquisition organization. You will find our mission, key players, program information, contract opportunities, announcements, and notices. You can access the Web page at <http://soal.socom.mil>.

Defense Technical Information Center (DTIC)

DTIC is a major component of the DOD scientific and technical information program. It contributes to the management and conduct of Defense R&D efforts by providing access to, and transfer of, scientific and technical information between DOD personnel, DOD contractors, potential DOD contractors, grantees, and other US Government agency personnel and their contractors.

DTIC holdings include: technical reports and other printed and non-printed

products: Defense research; management information summaries of ongoing, completed, or terminated work units; and independent R&D technical plans - distribution of which is limited to DOD personnel. It also offers access to many other research and acquisition management-oriented products such as special collections, referral databases, and profile-based current awareness services.

In addition to its own registered user community, DTIC also releases unclassified/unlimited technical reports and bibliographic information to the National Technical Information Service (NTIS), a Department of Commerce agency which serves the general public.

DTIC is headquartered at Fort Belvoir, VA, with field offices in the Los Angeles, CA; Boston, MA; and Albuquerque, NM areas. You can contact DTIC by phone (703) 767-8273, FAX (703) 767-8228, E-mail reghelp@dtic.mil, the DTIC Web page www.dtic.mil/, or write to:

Defense Technical Information Center
John J. Kingman Rd., STE 0944
Ft. Belvoir, VA 22060-6218

Commerce Business Daily (CBD)

Another way to learn of proposed USSOCOM procurements is through the CBD. This paper is published every working day, by the Department of Commerce, and lists virtually every proposed DOD procurement estimated to exceed \$25,000. It lists major DOD prime contract awards that have potential for subcontracting opportunities, and DOD needs for R&D efforts in fields or technological areas in which USPs may be appropriate. The CBD is available for viewing at each DOD procurement and contract administration activity, all field offices of the Small Business Administration, the Department of Commerce, and the General Services Administration, as well as many local chambers of commerce and libraries. The CBD web site is: <http://cbdnet.gpo.gov/>. In addition, announcements are posted on our Web page soal.socom.mil. Contractors may subscribe to the CBD by writing to the Superintendent of Documents, US Government Printing Office, Washington DC 20402; or call 1-800-567-8476.

Approved Desired Operational Capabilities (DOCs)

The objective of Desired Operational Capabilities (DOCs) is to identify SOF future capabilities to support USSOCOM flagship capabilities. The DOCs listed below will be supported by new operational concepts, leap-ahead technologies and non-material solutions.

- Personnel Survivability
- Counter WMD

- Mobility in Denied Areas
- Remote Reconnaissance
- Information Avenues
- Sensory Enhancements
- Organizational Design
- Space and UAV Utilization
- Recruitment & Leader Development
- Versatile Weapons

You can access information on DOCs by visiting our Web page
<http://soal.socom.mil>.

Mission Needs Statement (MNS)/Operational Requirements Document (ORD)

USSOCOM has a process for releasing MNS and ORDs. Since 1996, “newly created” MNS and ORDs contain secondary distribution statements and are made available to industry. MNS and ORDs created prior to 1996 do not carry distribution statements and will be made available on a case-by-case basis. Contact the TILO to request a MNS or ORDs from either category.

Informational Publications

The following documents are available for review through the TILO or SADBUI.

- Long Range Acquisition Plan – a listing of potential business Opportunities (<http://soal.socom.mil/competition02d.htm>)
- C⁴I Strategic Planning - documented strategy describing doctrine, architecture, investment and implementation plans
- C⁴I Architecture - detail of operational based framework that guides the strategy
- SBIR Announcements
- Unsolicited Proposal Guide (<http://soal.socom.mil/competition02d.htm>)
- Selling to USSOCOM Pamphlet (<http://soal.socom.mil/competition02d.htm>)
- Required Capabilities Document

HOW CAN I MAKE MY CAPABILITIES KNOWN?

Visit Policy and Procedures

Industry representatives are always welcome to visit USSOCOM. The TILO, or in the case of a small business the SADB, is your first point of contact within the command. Small businesses desiring to present their overall capabilities to USSOCOM should contact the SADB, who will act as their sponsor. It is preferred that you schedule an appointment to determine staff availability. You can reach the TILO at (813) 828-9482 and the Small Business Office at (813) 828-7549.

We encourage you to make the most of your visit to USSOCOM. Industry representatives desiring to brief on a particular technology or product line should provide in writing: a brief synopsis of the briefing topic; any company literature; a company point of contact with telephone number; classification of the proposed briefing; three proposed dates for your visit; and the type of audio visual support required for your briefing, to the TILO. If the target audience is a Flag Level Officer or Senior Executive Service equivalent the TILO will require biographies on each individual from your firm that will attend the briefing. Requests may be mailed, faxed, or E-mailed to the TILO.

If your briefing will contain classified information, or you expect discussions to address classified information, have your Security Manager forward your clearance information, along with the anticipated dates of your visit and the name and phone number of your USSOCOM sponsor or the TILO, to the USSOCOM Security Management Office (SMO) or SOAL Visitor Control (if you are visiting the Acquisition Center building 143) at:

US Postal Service and Express Mail:

USSOCOM

ATTN: SOCS-SM* or SOAL-MA**

7701 Tampa Point Boulevard

MacDill AFB, FL 33621-5323

**The SMO can be reached by telephone at (813) 828-4247 or FAX at (813) 828-6905.*

*** SOAL Visitor Control can be reached at (813) 828-9451 or Fax (813) 828-9488.*

Unsolicited Proposal (USP)

USSOCOM has a continuing interest in receiving proposals that contain new ideas, suggestions, and innovative concepts for weapons, supplies, facilities, devices, and equipment. "Unsolicited proposal" (USP) is the term used to describe a unique and innovative proposal submitted on the initiative of an individual, a private firm, a nonprofit organization, or an educational institution which is not in response to a formal or informal request (other than a publicized general statement of need). The Government has eliminated *advance proposals*

for specific agency requirements that would normally be procured through competitive methods, and offers of commercial products that are usually sold to the general public from this category. The Government may not accept a USP that closely resembles a pending competitive acquisition requirement.

Organizations and individuals are encouraged to make preliminary contacts with appropriate agency personnel prior to expending extensive effort on a detailed USP. Such contacts are conducted in a manner that will preclude agency commitments, explicit or otherwise, regarding the acceptance of a USP.

When you talk to scientists and engineers about USPs, be sure and ask if there is an active BAA covering the subject under discussion. If there is, submit your proposal in response to the BAA and not as a USP. More detailed and complete information is contained in USSOCOM's, "Guide for Unsolicited Proposals," which can be obtained through the TILO, the Federal Acquisition Regulation, Part 15.6, or on the web: <http://soal.socom.mil/competition02d.htm>.

HOW DO I GET TO MACDILL AFB?

From Tampa International Airport:

Take I-275 North to Dale Mabry Ave (Southbound). Proceed south on Dale Mabry Ave for several miles, until it ends at the main gate of MacDill AFB. (You must stop at the Visitor Center located on the right hand side of Dale Mabry Ave, just prior to the gate, unless you possess a military identification card.)

From the North:

Take I-75 South to I-275 South. Proceed southbound on I-275 to Dale Mabry Ave (Southbound). Proceed south on Dale Mabry Ave for several miles, until it ends at the main gate of MacDill AFB. (You must stop at the Visitor Center located on the right hand side of Dale Mabry Ave, just prior to the gate, unless you possess a military identification card.)

From the South:

Take I-75 North to the Leroy Selman Expressway. Proceed West on the Expressway to the last exit. This exit makes almost a complete circle. Go to the light (Dale Mabry Ave). Turn right. Proceed south on Dale Mabry Ave for several miles, until it ends at the main gate of MacDill AFB. (You must stop at the Visitor Center located on the right hand side of Dale Mabry Ave, just prior to the gate, unless you possess a military identification card.)

From the West:

Take the Gandy Bridge, the Howard Franklin Bridge, or the Courtney Campbell Causeway to I-275 North exit right onto Dale Mabry Ave. Proceed south on Dale Mabry Ave for several miles, until it ends at the main gate of MacDill AFB. (You must stop at the Visitor Center located on the right hand side of Dale Mabry Ave, just prior to the gate, unless you possess a military ID card.)

From the East:

Take I-4 to I-275 South. Stay on I-275 South to Dale Mabry Ave (Southbound). Proceed south on Dale Mabry Ave for several miles, until it ends at the main gate of MacDill AFB. (You must stop at the Visitor Center located on the right hand side of Dale Mabry Ave, just prior to the gate, unless you possess a military identification card.)

To get to the TILO Office, Building 143:

Once on MacDill AFB, proceed along North Boundary Road. Bear right as you pass in front of CENTCOM HQ onto Hanger Loop. When the road becomes one way move to the left and turn left onto Florida Keys Ave. Go past the fire station and an intersecting road and turn left after the next building into the parking lot of Bldg 143. The front desk will contact whomever you wish to visit. You must provide picture ID to enter the building.

To get to the SADBUs Office, Building 102:

Once on MacDill AFB, proceed along North Boundary Road. Bear right as you pass in front of CENTCOM HQ onto Hanger Loop. When the road becomes one way move to the left and turn left onto Florida Keys Ave. Proceed on Florida Keys Ave. to the MacDill Federal Credit Union building (on the right). You may park anywhere other than under the Credit Union building. The SADBUs is on the 2nd floor - the receptionist will contact whomever you wish to visit.
